

Line 23, after "interposer" insert --962--; same line  
after "and" insert --964--;

Line 24, after "Chips" insert --966 and 968--;

Line 27, change "substrate." to read --substrate 970--.

Page 33, line 23, change "center-to-center" to  
-- center-to-center --.

#### REMARKS

The present preliminary amendment presents new claims directed to processes including assembly of the film or "interposer" as referred to in the specification to the chips while the chips are in the form of a wafer. These features are set forth, *inter alia*, at pages 30-31 of the present specification. By the present amendment, the specification has been modified to refer to reference numerals in figures 31 through 33. These figures were added by amendment in U.S. Patent Application Serial No. 08/319,966, filed October 7, 1994, now U.S. Patent No. 5,685,885. Indeed, the exact same figures are described by verbatim identical text (with reference numerals) in prior application Serial No. 08/278,394 (see Figures 14-16 and specification, pages 24-25 of the '394 application). Manifestly, the introduction of reference numerals into the present specification introduces no new matter.

The present preliminary amendment also amends the specification filed herewith to correct certain typographical errors and to correct the cross-reference to related applications.

#### IDENTIFICATION OF CLAIMS PURSUANT TO 37 C.F.R. § 1.607(b)

The present claims correspond exactly or substantially to claims 1, 2, 6, 7, 8 and 10 of U.S. Patent No. 5,950,070. Other claims of the '070 patent may also correspond to the present claims.

If the Examiner has any questions in connection with this communication, the Examiner is encouraged to contact Applicant's attorney at the telephone number below. If any fee is due in connection with this amendment, the Examiner is authorized to charge Deposit Account No. 12-1095 therefor.

Respectfully submitted,
